

Be Ahead with Sustained Excellence

Dear Sir/Madam,

BASE Brings ClassroomConnect - VSAT-based Training Programs

As the leader in student training in Karnataka that provides courses to students aspiring for competitive exams like IIT JEE, AIEEE, AIPMT, CET, and NTSE, BASE has the resources, infrastructure and the commitment to deliver superior level inputs to enable superior level achievers. We have the distinction of sending more students to IITs than all other competing organizations put together. Established in 1991 by Dr. H.S. Nagaraja, an eminent educationist, BASE training is delivered by a faculty team of 150 members across different centres in Karnataka. It is our innovation coupled with a strong student orientation that makes our programs successful.

Classroom Programs & Distance Learning Programs. Beyond Classroom training programs, BASE has a range of Distance Learning Programs, wherein learning is facilitated to students through courier/ mail/ email. The success of classroom programs and distance learning programs has spurred us to reach for students in far off places and make a difference to the quality of their learning.

ClassroomConnect through VSAT.

BASE takes the next big leap into the future by launching ClassroomConnect, through which we deliver quality training through VSAT. It is a powerful and visionary approach that can take our world class teaching methods to any place, however remote. It is extremely easy to use and practical. In fact, it has been operational on an experimental basis at a centre for over 2 years, from where successful students have already made their mark.

More information on ClassroomConnect is available in the brochure attached.

For a more elaborate view of ClassroomConnect and benefits for institution/student, please write back or call me right away.

With warm regards,

Yours truly,

Purushotham B G
