

How BASE Helps You

BASE methodology: They go in a clear order and suggest everything, so if you can follow that it is good.

Gowtham S,
IIT-JEE 2009
Now @ IIT Chennai

... his time management was really good after joining BASE. And in the final year, 2nd PU he has done really good.

Father of Chetan S,
IIT-JEE 2009
Now @ IIT Chennai

Once you study in BASE for competitive exams, it prepares you for competitive exams throughout the world. I wrote the SAT in America. It was very easy, thanks to BASE.

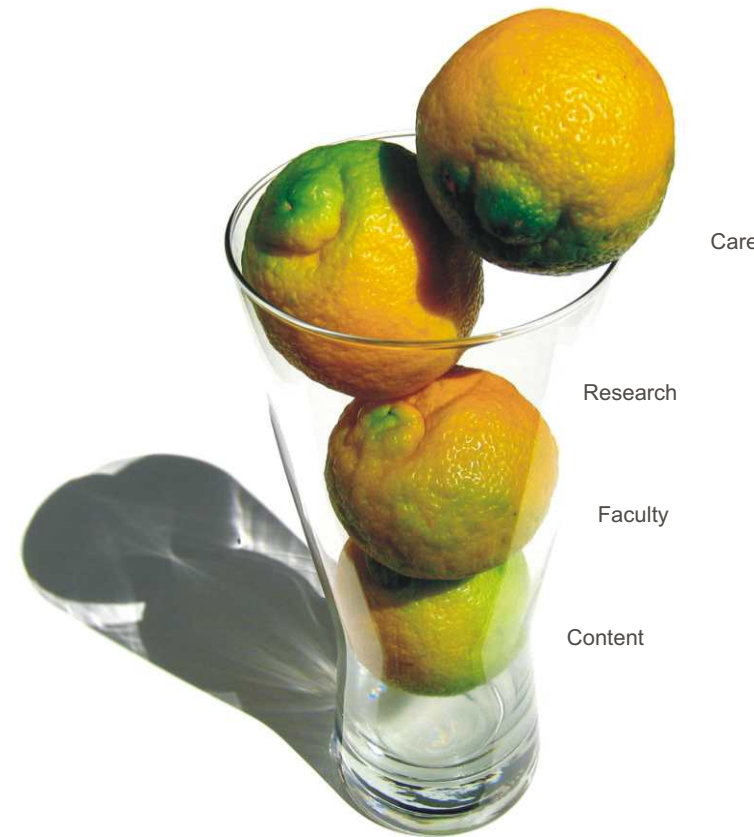

Kiran Pathakota,
Now @ Houston, Texas, US: Electrical Engineering

I have been with BASE right from N Skill days. I have spent 5 years. At the end, I think it has helped me a lot.

Harsha N Bhushan,
1st Rank in 2nd PU, 2009
Now @ BMS College of Engg, B'lore

Our teachers did not just teach us the syllabus but taught us to discover. Our mentor, Dr. G K Bhat has always been there for us, showering us with hope, inspiration and of course, Zoology!

Aditi Rao,
II AIPMT 2008-10

A Lot Goes into Creating Winners - Year after Year.

Admissions Open for 2010 Batches.

To register, please call any of our centres, or reach us on email at info@base-edu.in

BASE Classes at:

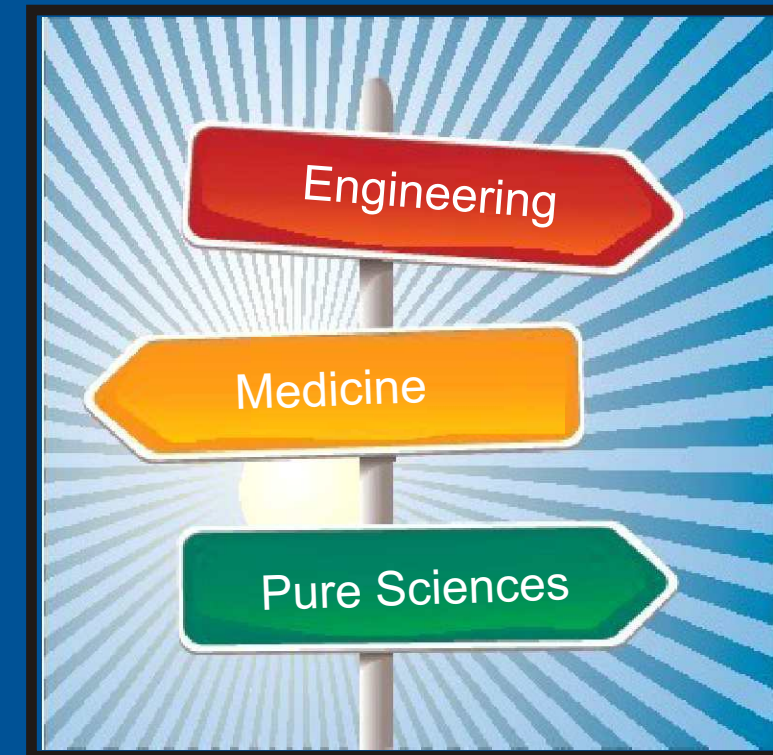

Bangalore (Basavanagudi, Rajajinagar, Jeevanbimanagar, Yelahanka, Malleshwaram, JP Nagar & Marathahalli), Belgaum, Bidar, Bijapur, Dharwad, Hubli, Mysore, Tumkur & Udupi

Head Office: BASE Educational Services Pvt. Ltd.,
27, Bull Temple Road, Basavanagudi, Bangalore 560004
Tel: 080-4260 4600 email: info@base-edu.in

Be Ahead with Sustained Excellence

What Next After Standard X?

It's Time to Think Ahead.
It's Time for Career Planning.

Be Ahead with Sustained Excellence

Standard X: The Defining Moment

Standard X is definitely one of the most significant stages in a student's academic career. While on the one hand, there is the Board Exam, which is the first big test of the student's cumulative knowledge and character, it is as well time to think of the life ahead. In fact, it is time to do some serious career planning. The big question: What next?

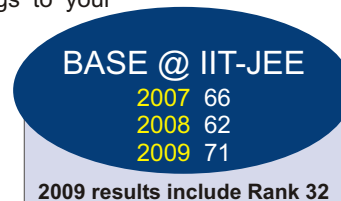

BASE, the leader in student training, urges you to appreciate the importance of choices at this crucial juncture, and highlights a few pointers that need consideration.

What Next?

Indeed, it is a small but very big question, one that calls for introspection, discussion with elders and a careful analysis of individual aptitude and strengths.

Before making the immediate choice among Arts, Commerce and Science, you must have some idea of what you wish to become. Give wings to your imagination and ask yourself questions like ...

"What is it that I like doing and enjoy?
What am I good at?
What kind of a career can I fit into?
What are the opportunities in today's world?"

And then, do the backward planning. In order to reach there, find out which stream you need to go into. Do not jump to conclusions, like most of today's students. An open and intense discussion with elders and friends will do a world of good.

If it is Sciences, Get the BASE Advantage

If you have decided that you would like to be an engineer, or a doctor, or become a nuclear scientist, or an architect, or feel best suited for bio-engineering, or have passion for pure sciences ... You obviously need to be in the science stream at the Plus 2 level.

And if you are choosing science stream, ensure that you have the BASE advantage. Because BASE can take you very close to your ambition.

Why BASE?

BASE is an institution that prepares talented students for superior level achievement. Be it for IIT Entrance, CET, Medical Entrance, ... our training programs are designed to deliver success. BASE has an exemplary track record because of our resources, commitment and passion. Talk to any of our students, and you will realize how true it is, and why we are different.

Parents Play a Vital Role Now!

Plus 2 is a very crucial phase in a student's leap into the future. The student is subject to change across several dimensions - new college, new friends, new teachers, bigger books, more complexity, and a new sense of freedom which he/she does not know how to take in... Just the reason why a parent needs to be lot more in sync with the pangs of change his son/daughter is coping with.

- Dr. H.S. Nagaraja, Founder Director, BASE

Achievement @ International Olympiads

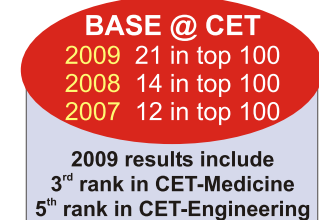

BASE achievers who have represented India and have won medals at international Olympiads include:

Astronomy Physics

Amit Warriar, Ukraine, 2007
Harish R, Singapore, 2006
Arjun R, Spain, 2005
Ajit Kumar Nema, South Korea, 2004
Sundeep B, Bali, 2002
Narayan Satyan, Turkey, 2001
Harsha Madhyastha, Italy, 1999
Kishore J, Singapore, 2006
Joish Rajendra Kumar, Taiwan, 2005
Kiran C, Athens, 2003
N R Prasad, South Korea, 2000

Chemistry

Mathematics

Career Counselling for X Standard Students

BASE invites students and their parents to contact our centres for a discussion on career options.

Admissions
Open

BASE Programs commence end-April 2010. Selection Test on April 11, 2010 for IIT JEE Achiever and Medical Excel. Registrations open. To register, call us or visit our website www.base-edu.in

Career Possibilities: A Bird's Eye-View

If you are desirous of building on your passion and aptitude for sciences, here is a broad overview of the career possibilities. This is by no means a comprehensive guide; it is designed to kindle the fire of ambition in you and inspire you to achieving your career goals.

Technology

There is hardly a sphere of life that is untouched by the magic of technology. Technology in the Digital Age has constantly been redefining the way people round the world live, play, learn and entertain. And quite frankly, experts say, this is only the beginning. You too can join the party and leave behind your footprints in the sands of time!

So, where do you start? After your Class XII, institutions where you can study engineering/technology include the IITs (15 of them across the country), the NITs (one in each state), BITS Pilani, IIST, colleges in VTU, ... And the range of options in branches is mind boggling!

After BE/ B Tech., if you wish to pursue higher studies, you can opt for either M Tech./ MS and go further towards Ph.D or branch off to study MBA.

Medicine

A progressive country is all about healthy people. For a country of 100 crore people, healthcare will always be top priority. In fact, there are just 4.5 physicians per 10000 persons in India. And as we step into the future where medicine, married with technology, is poised to usher in dramatic advancements in disease treatment and wellness, the need is for a new generation of medical professionals with commitment, passion and innovation.

If you are keen on studying medicine after Class XII, you could work towards making it into one of the top medical institutions that include AIIMS, JIPMER, AFMC, MGIMS, CMC Vellore, St. Johns and several other reputed colleges in Karnataka.

After MBBS, you can pursue MS or MD or research in frontier areas .

Pure Sciences

Reap what you invest in research. This is true as much of a multinational company as it is true of a nation. India, has well and truly arrived, in the field of research. Always a country that has prided on its original thinkers and mathematicians, India has today several institutions of national importance that are strategically focused on defined areas of research. Be it agriculture, or microbiology or astro sciences, there are great institutions that can nurture your intellect and create further opportunities for higher learning. These include IISc., TIFR, IISER, IIST, IITs, NDRI, ISI, ...

Those who pursue pure sciences with passion and commitment can aspire to careers in academics or research, worldwide. If inventions and innovations excited you as a child, they could very well be your life's big treasures in time to come.

So, What's Your Goal?

If you wish to know more about these career possibilities and institutions of higher learning, come and talk to us.
